TITLE : MASSAGE MACHINE

ABSTRACT : PROBLEM TO BE SOLVED: To provide a massage machine capable of applying an effective massage according to the variation of obtained physiological data of a subject by centralizing measuring means for measuring the pulse rate, dermal temperature, etc., of the subject on a remote controller.

SOLUTION: The massage machine has massaging fingers 13 and 13 for massaging the body of a subject and a control means 20 for controlling the motion of the massaging fingers 13 and 13, and is operated by the remote controller 30. The remote controller 30 has a first finger-rest part 36 and a second finger-rest part 37 to which the subject's fingers abut when the subject holds the remote controller. In the massage machine, a means 40 for measuring physiological data of the subject generated when massage is applied to the subject is mounted in the first finger-rest part 36 and/or the second finger-rest part 37.
